

My Accounts Page: Payment History Tab

The Payment History Tab shows a user the chronology of payments that have been made from their account while filling out payment-enabled Forms from the Forms Module. If a Form requires a payment, the transaction will be logged to the user’s account and history maintained on this page.

The payment history is shown in table format. Transactions are listed with the most recent entry first. The Description field is the posted description of the transaction, which is set by the Form designer. In the Attachment(s) column, you can download a receipt of the transaction to keep with your local records.
