Assets Settings Page: Meter Types Tab

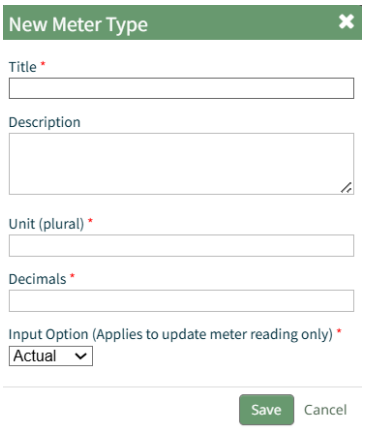

Various types of meters can be created and managed from the Meter Type Tab on the Settings Page of the Assets Module.

> The table shows types of meters, not a list of individual meters. New meter types will be listed in table format on the Meter Type Tab with the meter data fields as column headers.

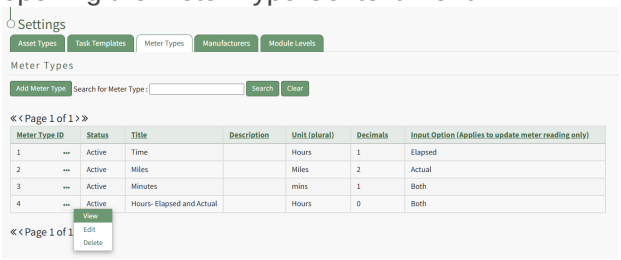

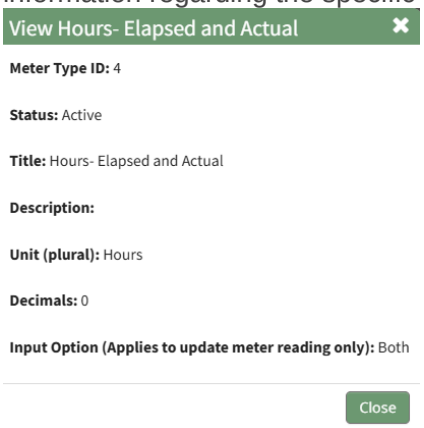

Selecting the green “Add Meter Type" button will open the New Meter Type Modal, from which a new meter can be named and parameters designated.

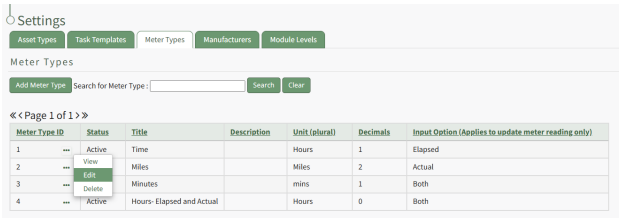

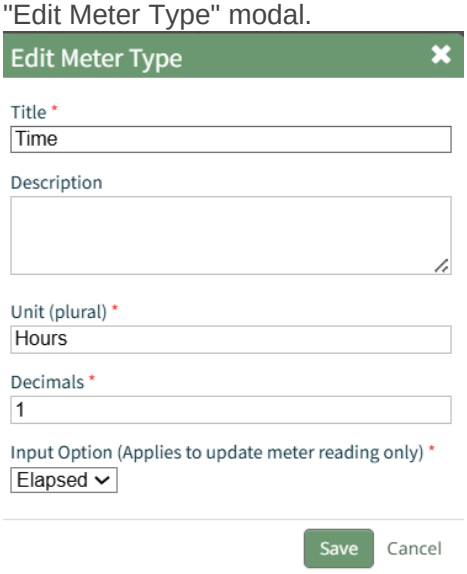

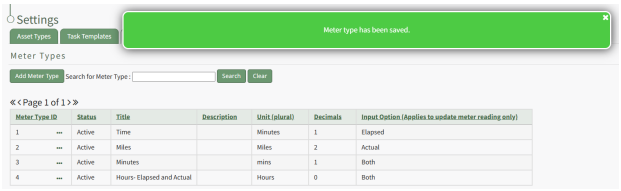

The dropdown list of log input options includes “actual,” “elapsed” or “both” to allow one to select an applicable data metric to track the new meter.

Selecting the three-dot icon to the right of a Meter Type title will open the Meter Type Context Menu. The options available to manage the Meter Type are explained in the table below.

Meter Type Context Menu Option Explanations Table	
Option	**Explanation**

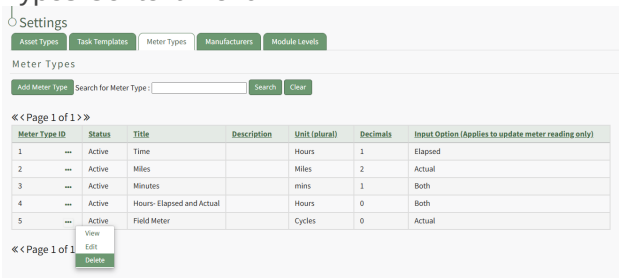

View	Selecting "View" from the context menu will open the View Meter Type Modal which lists all key information regarding the specified meter type. **How To: View a Meter Type's Key Information** To view the key information about a specific meter type, go to the Meter Types Tab on the Settings Page of the Assets Module. Select the three-dot icon to the right of the meter type ID opening the Meter Type Context Menu.  Select "View" from the context menu opening the View Meter Type Modal which states all information regarding the specific meter type.  The View Meter Type Modal is read-only. Select the "Close" button and return to the Meter Types Tab on the Settings Page.

Edit	Selecting “Edit” from the context menu will open the Edit Meter Type Modal where the meter fields can be altered. **How To: Edit a Meter Type** To edit a meter type, go to the Meter Types Tab on the Settings Page of the Assets Module. Select the three-dot icon to the right of the meter type ID you wish to edit opening the Meter Type Context Menu.  Select "Edit" from the context menu opening the "Edit Meter Type" modal.  Make any desired changes and select the "Save" button.  A pop up confirms that the changes to the meter type were saved.

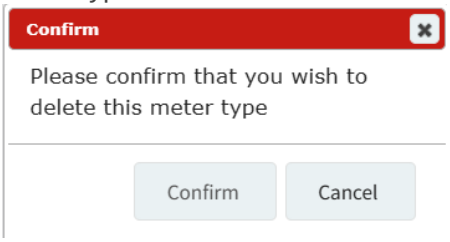

Delete	Selecting Delete from the Meter Type Context menu will open a deletion confirmation modal that states, "Please confirm you wish to delete this meter type."

How To: Delete a Meter Type

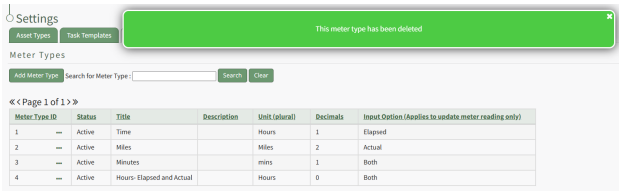

To delete a meter type, go to the Meter Types Tab on the Settings Page of the Assets Module. Click the three-dot icon to the right of the meter type ID that you wish to delete opening the Meter Types Context Menu.

Select "Delete" from the context menu opening the Delete Meter Type Confirmation Modal which states, "Please confirm you wish to delete this meter type."

Select the "Confirm" button.

A pop up confirms the Meter Type has been deleted and is removed from the Meter Type Table.
