Calendar: Introduction

- Calendar Module Summary

Calendar Module Summary

The Calendar Module is a Gregorian calendar in KAStrack where meetings and events can be created and shared. The Document and Assets Modules integrate with the Calendar Module, showing task schedules and documents that need review for continued suitability.

The Calendar Module is comprised of two pages, the Home Page and the Settings Page. Both pages can be accessed through the Main Menu on the left-hand side of the screen.

> The User Manual for the Calendar Module is updated through Version 12.0.
