Complete List of Dashboard Module How Tos

How To: Add a Module Summary Widget to the Dashboard

To add a module summary widget to the dashboard, go to the Dashboard Module and select the specific Dashboard you wish to add widgets to.

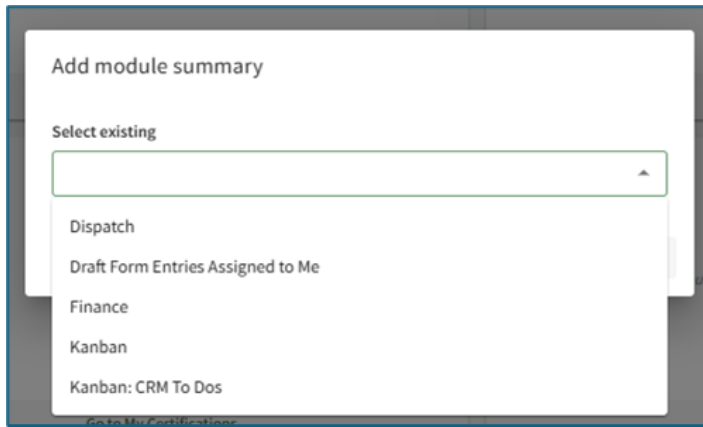

Select the “+ Add Widget” button from the right-hand sign of the screen.

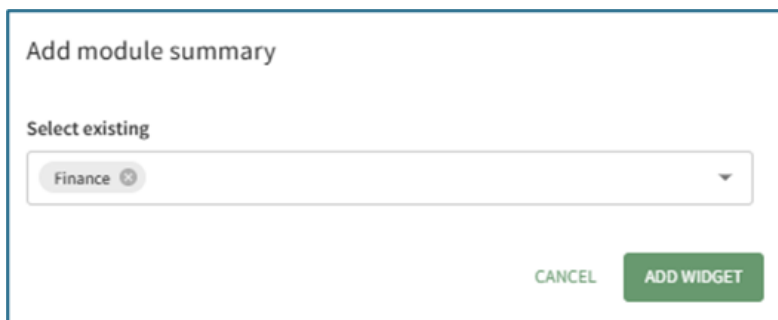

This opens a modal with three options: Speed dial, Module summary, and Chart.

Select the “Module Summary” icon opening the Add Module Summary Modal.

Any possible module summaries that are not yet included on the current dashboard will show in a dropdown menu on the modal.

Select the desired widget to be added to the dashboard. Multiple module summaries can be selected at once if desired.

Click the "Add Widget" button and the selected module summary will now show at the bottom of the Dashboard.

Module summary widgets can only be added to one dashboard at a time. For the widget to show on multiple dashboards, it must be added to each dashboard individually.

How To: Add Forms to the Forms Module Summary Widget

To add a specific form so that it is displayed on specific user's the Forms Module Summary dashboard widget, go to the Form you want included on the Home Page of the Forms Module. Select the three-dot icon opening the Forms context menu.

The Speed Dial will now show on the dashboard in the desired placement.

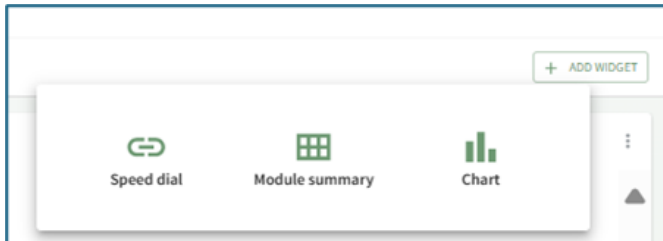

You can select multiple speed dials (if there are more than one available) from the dropdown to add them all to the Dashboard at the same time.

Delete a Speed Dial

To delete a speed dial, go to the Dashboard Module and select the dashboard you wish to make speed dial edits on.

The most efficient way to delete a speed dial is from its current placement. Refer to the table below to identify how to access the “Edit” option from each of the various speed dial placements.

How to Select Edit Based on Speed Dial Placement			
Placement	Top	Floating	Widget
Image			
Notes	Selecting the vertical three dot icon opens the context menu with the “Edit” option.	Click the floating speed dial icon to open it, showing the “Edit” option.	Selecting the vertical three dot icon opens the context menu with the “Edit” option.

Click the “Edit” button for the speed dial you wish to alter, opening the Edit Speed Dial Modal.

The 'Edit speed dial' modal is shown with a title field containing 'KASLinks', a placement dropdown set to 'Widget', and a links section with a 'Website' label and an '+ Add Link' button. At the top right is a 'DELETE' button with a trash icon. At the bottom right are 'CANCEL' and 'CONFIRM' buttons.

Select the “Delete” button in the top right hand corner of the modal.

A confirmation modal titled 'Delete speed dial' is displayed over the 'Edit speed dial' modal. The message reads: 'This will affect all dashboards where the speed dial is present. Are you sure you want to permanently delete this speed dial?'. It features 'CANCEL' and 'CONFIRM' buttons at the bottom right.

This opens the Delete Speed Dial Confirmation Modal that states, “This will affect all dashboards where the speed dial is present. Are you sure you want to permanently delete this speed dial?”

Select the “Confirm” button.

You can also select the “+ Add Widget” button from the top right-hand corner of any dashboard and click the speed dial icon.

The 'Add Widget' modal is shown with a title bar containing a '+ ADD WIDGET' button. Below the title bar are three widget options: 'Speed dial' with a chain link icon, 'Module summary' with a grid icon, and 'Chart' with a bar chart icon. A vertical ellipsis menu is visible on the right side of the modal.

This opens the Add speed dial modal.
