

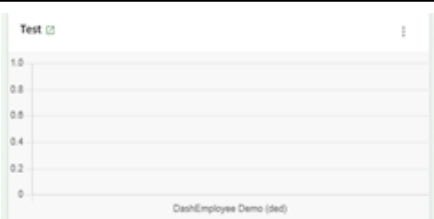

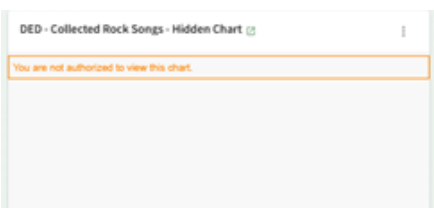

# Chart Wizard Explanation

Chart Widget Explanation Table		
<p>The widget header in bold identifies the chart title and the chart type.                      The vertical three dot icon to the right opens a context menu with the options to View Chart and Unpin.</p>		
Charts	Type and Recommended Usage	Image
Representative	<p><b>Bar Chart:</b>                      Recommended when comparing quantities across different categories</p>	
	<p><b>Horizontal Bar Chart:</b>                      Recommended when comparing quantities across different quantities</p>	
	<p><b>Pie Chart:</b>                      Recommended when showing composition and parts of a whole</p>	
	<p><b>Line Chart:</b>                      Recommended when showing continuous data trends over time</p>	
	<p><b>Doughnut Chart:</b>                      Recommended when showing parts of a whole and highlighting a total or key metric in the center</p>	
	Trending	<p><b>Line Chart:</b>                      Recommended when emphasizing patterns and direction of change</p>

Empty Chart	If you see a chart but no data appears, confirm that the value column contains numeric values.	
	If a chart widget does not show a chart, it is because you do not have authorization to view that data.
