

Database Module Summary

The Database Module allows for the creation, viewing, management and storage of custom databases. Databases can integrate with other KAStrack Modules, as well as other databases in the Database Module.

Integrates With

Essential Suite Modules	Primary Suite Modules	Advanced Suite Modules	Specialized Suite Modules
Accounts	Assets	Database	Attendance
Calendar	Actions	Forms	Dispatch**
Comments	Courses	Grid	Finance
Communications	Documents	Integrations	Inventory
Dashboard	People		Kanban
Site Settings	Reports		Remotes
Tags	**Integration between Database and Dispatch is limited to the Locations Database.		

There are three pages in the Database Module that can be accessed from the Main Menu: Home Page, Groups Page, and Settings Page.

Database Module Page Summaries Table	
Page	Explanation
Home Page	The Home Page contains the Database Table, where all existing databases built within your system are stored.
Groups Page	The Groups Page in the Database Module is utilized for organization function and allows databases to be grouped together for efficiency.

[Settings Page](#)

The Settings Page allows the user to customize and designate permissions for the Database Module. It contains the Manage Module Level Page.
