Dispatch: Introduction

- Dispatch Module Summary

Dispatch Module Summary

The Dispatch Module manages the scheduling and tracking of assets and people for remote deployment and integrates with the Communications, People, Documents, Assets, Actions, Reports and Forms Modules.

As a journey management tool, Dispatch utilizes stage approvals for logistics coordination. It allows the consolidation of information from other modules in one place for deployment. The Dispatch Module has the ability to email read-only PDF Dispatch Orders to pre-defined distribution lists.

> The User Manual for the Dispatch Module is updated through Version 12.0.
