

Forms Module Summary

The Forms Module houses all forms that are being utilized by KAStrack and allows for the creation, viewing, and management of the forms and the form entries. Forms can integrate with several modules explained in the Forms and Module Integrations Table below.

Forms and Module Integration Purposes	
Module	Purpose
Assets	Attach to Task
Attendance Log	Integrate with the Attendance Log Module
Database	Reference from Database
Dispatch	Include in a Dispatch
Documents	Add to Photo
Forms	Reference from a Form
Grid	Integrate with the Grid Module
Kanban	Integrate with the Kanban Module
People	Use as Activity for Certification

The Forms Module is comprised of three pages explained in the table below.

Forms Module Page Summaries	
Page	Purpose
Home Page	The Home Page contains the Forms Table, where all existing Forms built within your organization's subdomain are stored.
Groups Page	The Groups Page is used for organizational function and allows forms to be grouped together for efficiency and ease of use.
Settings Page	The Settings Page allows an individual to customize and designate permissions pertaining to the Forms Module for system users

The User Manual for the Forms Module is updated through Version 11.12.
