Buttons: Save, Cancel

Input the label for the field.

Select the field type (text or email) from the dropdown menu.

Selecting the checkbox enables customization to "Allow multiple values," make the field "Required," or make it a "Sensitive Field."

Designating the field as a "Sensitive Field" allows an extra step in form security when integrating these fields within the Form module. The Form Designer must explicitly choose when they wish to use a sensitive field.

The Permissions Table determines who can view / edit their own and other user's fields. Selecting the checkbox gives the individual the specified permission. Deselecting the checkbox removed the permission.

Select the "Save" button and the custom field now shows in the table.

Use the Drag Me icon to drag and drop the field into your desired position of choice.
