

Create a New Module Level (Courses Module)

Selecting “New Module Level” on the Manage Module Levels page opens the New Module Level modal. Input the name of the customized model level and select “Save.” Module levels will be listed alphabetically.

Users have administrative controls for customized module levels. Select Permissions (the bullet point list icon to the right of the eye) in order to identify the permissions the newly created Module Level has. **Permissions for Volunteer**

Access levels for all modules can also be managed in the Site Settings Module under Access Levels.

Revision #2
