

Create Module Levels (Inventory Module)

To create a customizable module level in the Inventory Module, go to the Module Level Tab on the Settings Page.

Select the “New Module Level” button opening the New Module Level Modal.

The modal has a green header bar with the title 'New Module Level' and a close button (X). Below the header, there is a label 'Module Level Name' followed by a red asterisk, indicating it is a required field. A text input box is provided for the user to enter the name. At the bottom of the modal, there are two buttons: 'Save' (green) and 'Cancel' (light gray).

New Module Level

Module Level Name *

Save Cancel

Input the new Module Level Name.

Click “Cancel” to return to the Module Levels Tab on the Communications Page without creating a new module level. Select “Save” and the new module level will show on the Module Level Table.

Users can select which permissions are allowed for a customized module levels. Select the Permissions icon (the bullet point list to the right of the eye) in order to assign the permissions the new Module Level would have within the Inventory Module.

Permissions for Warehouse Supervisor ✕

- ☐ admin
 - ☐ manage-permissions
 - ☐ delete-permission
 - ☐ list-manage-permissions
 - ☐ view-permission
 - ☐ manage-roles
 - ☐ add-role
 - ☐ assign-hidden-roles
 - ☐ delete-role
 - ☐ edit-role
 - ☐ role-permissions
 - ☐ view-roles
- ☐ manage-inventories
 - ☐ create-inventory
 - ☐ delete-inventory
 - ☐ edit-inventory
 - ☐ manage-inventory-databases
 - ☐ view-inventory
 - ☐ view-stock-log
- ☐ manage-stock
 - ☐ can-adjust

Save

Cancel

Select "Save" and the permissions are now assigned to the Module Level.

Access levels for all modules can also be managed in the Site Settings Module on the Access Levels Tab.
