

# Delete a Category

To delete a category, go to the Manage Page in the Tags Module. Select the Categories Tab.

Select the vertical three dot icon for the category you wish to edit.

Select “Delete” from the context menu opening the Delete Category Confirmation Modal.

The modal states, “Are you sure you want to delete the category (Category Name)?”

Select “Delete” and the category will be removed from the Categories List on the Categories Tab of the Manage Page. Any existing Tags in the category will have their Category changed to “uncategorized”.
