Delete an Inventory

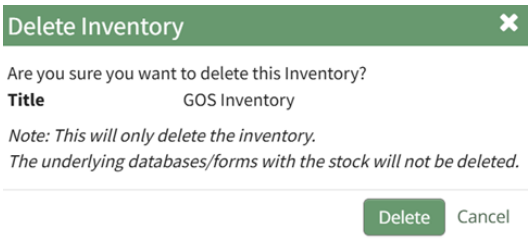

To delete an inventory, open the Home Page of the Inventory Module.

Select the three dot (…) icon to the right of the Inventory Title you wish to delete, opening the Inventory Title Table context menu.

Select “Delete Inventory” from the context menu, opening the Delete Inventory Confirmation Modal. The modal states, “Are you sure you want to delete this inventory?"

> This will only delete the inventory. The underlying databases/forms with the stock will not be deleted.

Select the “Delete” button to confirm the inventory deletion and return to the Inventory Module homepage. Click “Cancel” to return to the Home Page without deletion.
