

Export Registration Profiles

To export a CSV spreadsheet of existing registration profiles, go to the Registration Tab of the Site Settings Module.

The screenshot shows the 'Site Settings' interface with the 'Registration' tab selected. Below the navigation tabs, there is a section for 'Registration Profiles' with a plus sign and a three-dot menu icon. A table lists three profiles: Admin, General, and NewMember. Each row includes the profile name, the registration URL, the email verification requirement, and an 'Enable / Disable' checkbox.

Registration Profile	New User Registration URL	Require Email Verification	Enable / Disable
Admin	https://[redacted].kastrack.com/register/admin	Default (No)	<input checked="" type="checkbox"/> Enabled
General	https://[redacted].kastrack.com/register/general	Default (No)	<input checked="" type="checkbox"/> Enabled
NewMember	https://[redacted].kastrack.com/register/newmember	Default (No)	<input checked="" type="checkbox"/> Enabled

Click the three dot (...) icon to open a context menu. Select "Export".

The CSV file will automatically be downloaded to your personal device.
