

# Logs Tab

The Logs Tab on the Site Settings Page is a log of read-only records of historical actions within your installation.

The screenshot shows the 'Site Settings' interface with the 'Logs' tab selected. The interface includes a navigation bar with tabs for 'Company Info', 'Access Levels', 'Security', 'Registration', 'Email Settings', 'Inactive Accounts', 'Payment Settings', 'Account Fields', 'Table Defaults', and 'Logs'. Below the navigation bar, there is a 'Logs' section with a search bar and a 'Show 10' dropdown. The main content is a table with the following columns: Date, Type, Action, Object, Note, Logged In User, and Admin User. The table contains 9 rows of log entries.
